PROFILE

Independent Front-End Developer with a strong focus on delivering immersive and engaging user experiences through efficient website development. Adept at blending the art of design with programming skills to create visually appealing and functional websites.

INTERNSHIP

Front-end and cross-platform track

Information Technology Institute (ITI)

📅 03/2023 - 06/2023

Wroked on real-world projects, collaborating with a team of developers, enhancing technical skills in front-end web development (**HTML, CSS, JavaScript, TypeScript**), and frameworks like **Angular, React** (with **Redux**). Proficient in **Node.js, Express.js, MongoDB, UI/UX** principles (**Figma**), and cross-platform mobile app development (**React Native, Flutter**).

React Development Cross-Skilling

FWD & Udacity

📅 09/2022 - 10/2022

Immersed in **React.js**, focusing on mastering its principles and best practices. Developed a strong understanding of component-based architecture, building reusable and modular UI components for efficient and organized code. Implemented **React Router** for seamless navigation and explored state management using React's built-in state and **Redux**.

PROJECTS

IPark - ITI Graduation Project (Web & Mobile)

📅 06/2023 📍 ITI - Cairo Unviersity

IPark is a web and mobile app for seamless parking solutions. Find nearby garages, reserve with cash or card, and access reservation history. Admin dashboard for garage approval.
This project was built using: **React, Material UI, Bootstrap, Redux toolkit, Firebase, Google cloud, Stripe, Localization, React Native**
• <u>Web Demo</u> - <u>GitHub Web</u> - <u>Mobile Demo</u> - <u>GitHub Mobile</u>

Chatty (Web)

📅 07/2023

Chatty is a dynamic chat web app with secure login, real-time chatting, emojis, profile editing, and customizable dark/light modes.
This full-stack project was built using: **Node.js, Express.js, Socket.io, Bcrypt and MongoDB** on the server-side, and **React.js, Material UI, and Client Socket.io** on the client-side.
• <u>Demo</u> - <u>GitHub</u>

Nanny Finder (Mobile)

📅 2022 - 2023 📍 Upwork

Job matching app: Filtered user profiles, seamless communication via WhatsApp, email, and phone. Web version and admin dashboard included.
This project was built using: **Flutter, Flutter web, Firebase(**Auth, Firestore, Storage, Dynamic Links, Hosting, FCM)
• <u>Google Play</u> - <u>App Store</u>

EXPERIENCE

Software Developer

Upwork

📅 08/2021 - Present

🔗 https://www.upwork.com/freelancers/yomna

• Collaborated with clients to develop seamless mobile applications using **Flutter** framework.
• Leveraged **Firebase** for real-time database, user authentication, and cloud storage.
• Integrated various **APIs** to enhance app functionality and enable data synchronization with external services.
• Developed captivating, responsive user interfaces using **React.js** and **Next.js** for web projects.

SKILLS

HTML5 CSS3 JavaScript
